Club Columbia

By Club Columbia

the **specific person** with the **specific need**

- Columbia and Barnard students miss the on-campus community.
- Seniors are particularly nostalgic since we missed out on so much.

We need a way to connect and “run” into each other!

the **goal**

- Allow students to **connect**
- Columbia Students still care about grand issues. **Facilitate discussion**.
- **Public** as well as **private group** connection through breakout rooms or chats.
- **Share resources and news** in one location
- **Have fun!** Be able to be a kid again...play some games with friends
- Missing campus...**be on campus virtually**

the **research**

People like club penguin. There is a fb group called “clubumbia penguin” where people interact virtually to connect on each other’s servers to play together. We find that a pre-existing interest in club penguin will help garner attention to our product.

Club Penguin Is Back Online And The Number Of Users Are Overloading Its Servers

“Club Penguin is providing all the nostalgia after being put back online just a few years after it was shut down.”

the **design**

Club Penguin-inspired virtual community
just for Columbia and Barnard Students

- Workout with online videos with your friends
- Fence in pairs: rock, paper, scissors style but with attack, recover, advance, as well as where to attack etc

Math:
- Trivia and brain games

Subway:
- Subway surfer

the **implementation**

- Club Penguin is now open source! We will use this as the starting place.
- To set up a server, we will build through Node.js and mySQL
- We can also experiment with Unity for game design
- Many hours of coding to be finished later

Thank you!
